## About this poll

This report summarises the results of a weekly omnibus conducted by Essential Research with data provided by Qualtrics. The survey was conducted online from 24<sup>th</sup> April 2019 to 29<sup>th</sup> April 2019 and is based on 1,010 respondents.

Aside from the standard question on voting intention, this week's report includes questions on the 2019 Federal election and preferences and perceptions of the major party leaders.

The methodology used to carry out this research is described in the appendix at the end of the report.

Note that due to rounding, not all tables necessarily total 100% and subtotals may also vary.

## Federal voting intention

- Q If a Federal Election was held today to which party will you probably give your first preference vote? If not sure, which party are you currently leaning toward? If don't know - Well which party are you currently leaning to?

	Total	3 Weeks ago 08/04/19	5 weeks ago 25/03/19	Election 02/07/16
Liberal	36%	36%	35%	
National	4%	3%	4%	
<b>Total Liberal/National</b>	<b>39%</b>	<b>38%</b>	<b>39%</b>	<b>42.0%</b>
<b>Labor</b>	<b>37%</b>	<b>35%</b>	<b>36%</b>	<b>34.7%</b>
Greens	9%	11%	10%	10.2%
Pauline Hanson's One Nation	6%	5%	7%	
Other/Independent	9%	10%	8%	13.1%
<b>2 party preferred</b>				
Liberal/National	<b>49%</b>	<b>48%</b>	<b>48%</b>	<b>50.4%</b>
Labor	<b>51%</b>	<b>52%</b>	<b>52%</b>	<b>49.6%</b>

NB. Respondents who select 'don't know' are not included in the results. The two-party preferred estimate is calculated by distributing the votes of the other parties according to their preferences at the 2016 election.

## Expected Winner

Q Which party do you expect will win the 2019 Federal election and form Government?

	Total	Vote Labor	Vote Liberal / National	Vote Greens	NET: Vote Other
Labor	<b>59%</b>	95%	26%	73%	47%
Liberal/National	<b>41%</b>	5%	74%	27%	53%

- 59% of voters believe Labor will be victorious over the Liberal/National coalition in the 2019 Federal election. Expectations among supporters of the Labor party are high, with 95% believe Labour will win. The majority of Coalition voters (74%) and those intending to vote for another party/independent candidate (53%) expect the Coalition to form Government following the election.
- A majority of both men (60%) and women (58%) expect Labor to win the election.
- Over half of each of the age ranges 18-34 (61%), 35-54 (61%) and 55+ (56%) also expect Labour to form the next Government.

## 2019 Election Issues

Q How important are each of the following issues in deciding how you will vote in the next election? 10 - Very Important

## Appendix: Methodology, margin of error and professional standards

The data gathered for this report is gathered from a fortnightly online omnibus conducted by Qualtrics.

Every two weeks, the team at Essential considers issues that are topical, and a series of questions are devised to put to the Australian public. Some questions are repeated regularly (such as political preference and leadership approval), while others are unique to each week and reflect current media and social issues.

The response rate varies each week, but usually delivers 1000+ interviews. In theory, with a sample of this size, there is 95 per cent certainty that the results are within 3 percentage points of what they would be if the entire population had been polled. However, this assumes random sampling, which, because of non-response and less than 100% population coverage cannot be achieved in practice. Furthermore, there are other possible sources of error in all polls including question wording and question order, interviewer bias (for telephone and face-to-face polls), response errors and weighting. The best guide to a poll's accuracy is to look at the record of the polling company - how have they performed at previous elections or other occasions where their estimates can be compared with known population figures. In the last poll before the 2016 election, the Essential Report estimates of first preference votes averaged less than 1% difference from the election results and the two-party preferred difference was only 0.1%.

The online omnibus is live from the Wednesday night and closed on the following Sunday. Incentives are offered to participants. Essential Research uses the Statistical Package for the Social Sciences (SPSS) software to analyse the data. The data is weighted against Australian Bureau of Statistics (ABS) data.

All Essential Research staff hold Australian Market and Social Research Society (AMSRS) membership and are bound by professional codes of behaviour.
